EDUCATION

Bachelor of Computer Science, Joy University	2024–2028
CGPA: 8.8	
Class XII, Mahesh Singh Yadav College	2022–2024
Class X, British English School, Gaya, Bihar	2020–2022

SKILLS

Programming Languages :	C++
Frontend Development :	HTML, CSS, JavaScript
Backend Development :	Node.js, Express.js, RESTful APIs, EJS
Databases :	MongoDB, SQL Basic
Deployment & Hosting :	Render, Railway
Tools & Technologies :	Git, GitHub, VS Code

PROJECTS

AI Job Preparation Platform : [React.js, Node.js, Express.js, MongoDB, Gemini AI] [Live Link](#)

- Engineered a production-ready AI-powered job preparation platform using MERN stack and Gemini AI, enabling users to prepare effectively for interviews.
- Designed AI-based resume generation, interview question creation, and smart analysis features like skill gap detection and readiness scoring.
- Integrated resume parsing and PDF generation using Puppeteer, along with secure authentication using JWT for enhanced user experience.

MakeMemory (Airbnb Clone) : [Node.js, Express.js, MongoDB, EJS, Bootstrap] [Live Link](#)

- Built a full-stack Airbnb-style web application with complete CRUD functionality, allowing users to create, update, and manage listings efficiently.
- Designed a responsive and user-friendly interface inspired by Airbnb, including search functionality and seamless navigation across devices.
- Built a full-stack Airbnb clone supporting **100+ listings** with real-time CRUD operations and responsive UI.

Full-Stack Authentication System : [Node.js, Express.js, MongoDB, JWT, EJS, Nodemailer]

- Developed a secure full-stack authentication system with user registration, login, email verification using OTP, and OTP resend functionality.
- Implemented secure password hashing using bcrypt and JWT-based authentication with access and refresh tokens, along with session management and protected routes.
- Built a fully responsive dark-themed UI and integrated professional email templates using Nodemailer for secure user verification and authentication flows.

ACHIEVEMENTS & ACTIVITIES

- Secured **2nd position** in TANSON Horizon Hackathon by developing an Augmented Reality (AR) based solution using Blender, competing with multiple teams and delivering a functional prototype within a limited time.
- Selected as a member of the **ACM Sprint** technical community after qualifying for the selection test, actively participating in coding activities, and collaborative learning.
- Actively participated in hackathons and technical competitions, collaborating in teams to build innovative solutions under time constraints.
- Gained experience in problem-solving, teamwork, and project development through inter-college coding events and technical discussions, while collaborating with peers to analyze challenges, develop practical solutions, and improve overall technical skills.
- Regularly practicing **Data Structures and Algorithms (DSA)** in C++ and solving problems on **LeetCode** and **Codeforces** to strengthen algorithmic thinking, problem-solving skills, and coding efficiency.
